

eHome BeON

The ultimate EV charger synchronized with your home

- Would you like to charge your EV faster without the need of a costly installation upgrade?
- Would you like to avoid any risk of blackout when using the appliances and charging the EV at the same time?
- Would you like to have all this without a huge investment?

eHome BeON takes a new step in domestic EV charging allowing you to charge your vehicle while using your appliances.

Its intelligent sensor, easily added to the usual protection panel at home, dynamically adjusts electric vehicle's consumption if the house system is about to be overloaded.

eHome BeON measures and interprets the housing consumption, generates the corresponding signal and sends it to WallBox eHome charging station, which interprets and modifies its output current accordingly.

eHome BeON uses the moments when the house is using less power to charge your EV saving money and energy.
